Revoke John Smith Answered 34W since installation optifine add shadow as in shader folder will be displayed when optifine is installed in the same place and text folder packages so when you go on Minecraft select the Optifine version and launch it.. I do not know the origin of the problem but I had tried to do it because it has got Minecraft 1.. These settings focus on changes and adjustable effects that relate to light natural color games physical effects such as water or cloud tones etc.. 8 I had to remove and put Minecraft from scratch I tried to create a new folder named C but it says that the Existing Folder already exists and do not let me do one which means regular installers should identify users yet.
